

Hand Trace Illusion

STEP 1

Lightly trace around your hand (or hands) using a pencil.

STEP 2

Starting at the bottom of the tracing, use a marker to draw a straight line across the page. When the marker touches your pencil outline, make a curve until it reaches the other edge of your pencil outline.

STEP 3

Continue to fill the page with these lines.

STEP 4

Rub out the light pencil tracing.

STEP 5

Fill the spaces between your marker lines with alternating colours to complete the optical illusion.

WHAT YOU NEED:

Paper
Pencils
Eraser
Marker
